SYSTEM AND METHOD FOR PURCHASING STOCKS AND *BONDS*

ABSTRACT

PROBLEM TO BE SOLVED: To provide a system and method for purchasing stocks and *bonds* capable of reducing a huge time and labor which used to be required for applying for stocks and *bonds*-*secured* *loan* by a customer in a conventional manner by allowing a stock company to deposit stocks and *bonds* owned by the customer as a security according to an instruction from the customer, and...

...the customer according to the security estimated value.

SOLUTION: This system for purchasing stocks and *bonds* enabling purchase of new stocks and *bonds* by using stocks and *bonds* as a security is provided with a security processing means for setting a security on the stocks and *bonds* selected to the customer among the stocks and *bonds* owned by the customer and an adding means for adding a sum equivalent to the security estimated value of the stocks and *bonds* subjected to the security processing to a stock buyable sum.
